Hi Jayne,

As I mentioned in my earlier message, the estimates for this work are very rough and I think could be reduced significantly with some additional research into the models and technical files available as a starting point.

But as a ballpark, we estimate about (b) (5) for Tasks 1-4 and (b) (5) for 5-11. (b) (5)
Both sets of tasks include TMDL reports with two revisions based on team comments (in particular, tasks 1-4 would have some efficiencies on the reporting standpoint if grouped with the other tasks).

Please let me know if you would like to discuss or if you'd like us to dig deeper to refine the estimates at any point.

Thanks, Amy

Thanks, Jayne. One clarification - (b) (5)

Thanks,

Miranda Hodgkiss

Hi Amy,

Please provide a gross estimate of the following project (b) (5)
Provide separate estimates for tasks 1-4 from 5-11. Below is a link to the document and a rough estimate for the types of work we would need contractor assistance for, if we end up disapproving portions of the Deschutes TMDL:

<https://fortress.wa.gov/ecy/publications/SummaryPages/1510012.html>

Work that EPA could do if staff time/resources allowed (but I'm including it as a contractor request for now):

(b) (5)

A large rectangular area of the document is redacted with a solid gray fill. The redaction covers approximately five lines of text.

Work that we would need contractor assistance for (we also may or may not get cooperation/assistance from the state in completing these tasks):

(b) (5)

A large rectangular area of the document is redacted with a solid gray fill. The redaction covers approximately ten lines of text.

The contact for questions:

Miranda Hodgkiss
